

Würk Side Shield

The Side Shield is a barrier that protects workers sitting next to each other. Installing a screen between workers reduces the spread of airborne viruses. Sections can be made of glass, frosted glass or laminate. By selecting one of the non-transparent panels, Side Shield can also serve as a divider. There is no need for complicated assembly. Side Shield simply stays where you place it. Thanks to its innovative design and perfect weight distribution.

Features

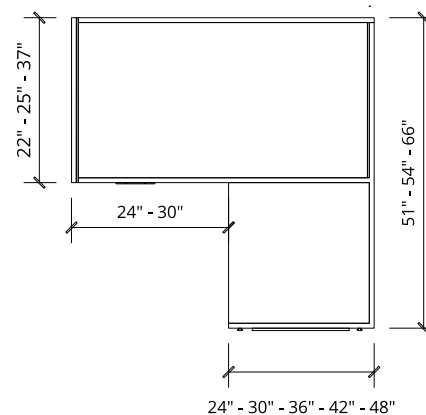

- Clear or frosted tempered glass
- Laminate lower section
- 6 mm tempered glass can be cleaned with healthcare-grade cleaners
- Levelers
- Powder coated aluminum frame and fasteners
